PROJECTS

Set List Live – UI/UX Case Study (Mobile App)

📅 07/2025 📍 Mohali, Punjab

- **Executed** an end-to-end mobile app UX for discovering and bookmarking live music events
- Conducted user research and usability testing to identify navigation and content discoverability issues
- Defined information architecture, user flows, and task journeys to reduce cognitive load
- Created low-fidelity wireframes → high-fidelity UI following mobile usability and accessibility guidelines
- Implemented task completion rate by ~22% by restructuring navigation and simplifying flows
